

RAPID DEPLOYMENT SHELTERS

| DRIVE-THRU | COMMAND POST | HOSPITAL |

SKU: K9102-25

MEDIUM TENT

450 Square Feet

DIMENSIONS:

Space: 450 square feet
Length: 25 feet
Width: 18 feet
Height: 10 feet
Door Size: 76"W x 84"H
Weight: 350 lbs
Box Size: 50"W x 48"H x 45"D
Inflation Time: 5-10 min.

INCLUDED ASSESSORIES:

Interior Walls (2)
15000 Lumen Lighting System w/ Dimmer
Auto Inflator
Inflator/Deflator Pump
1000W Power Bank
50' Extension Cord
Hook & Loop Sleeves (50)
Hook & Loop D-Rings (10)
Custom Sign Package (2 Top, 2 Sides)
Storage Bag

INCLUDED TOOLS:

Tie Down Straps (8)
Metal Stakes (16)
Metal Mallets (2)
Drive-on Anchor Plates (4)
3-Step Ladder
50 Gal Rolling Chest
Pallet Box with Lid

OPTIONAL ACCESSORIES:

HVAC System with Ducts
Temperature Control Unit
Power Distribution Box
Generator with Wheel Kit

COMMAND POST

SIGNATURE HIGHLIGHTS:

Flexible roll-up door openings with YKK zippers allow for two opening widths: a generous 76 inches for foot traffic or a spacious 16 foot drive-through option. Doors can be secured in the up or down position utilizing supplied D-rings. The double hook and loop strapping system on the door exteriors enables tents to interconnect seamlessly while preventing moisture from compromising door seals. Tent floor is easily removable by hook and loop attachment.

Two Oxford nylon privacy walls, each equipped with an adjustable roll-up centerline door, are securely attached by hook and loop to the overhead air frames. These walls and door feature a weighted bottom to ensure privacy or can be completely removed to open up additional interior space.

Six windows with adjustable configurations provide options for natural light, ventilation, or privacy as needed. Rolling down an outer PVC flap ensures privacy while a removable clear vinyl window allows for natural light or ventilation through a mesh liner. All vinyl windows are easily removable and secured by hook and loop.

For heating and cooling, an HVAC air plenum is included, designed for ease of use and efficiency. Two vertically mounted HVAC ducts route air through the Oxford nylon material and distribute it along the centerline through 2-inch holes.

For lighting, an included UL-rated 15,000 Lumen LED String Lighting System features a remote-capable dimmer switch. Using the 6-inch hook and loop sleeves, the lights are easily hung and arranged in any configuration needed.

The package includes an inflator/deflator pump for quick setup and deflation. Inflation to full pressure (2.0 PSI) takes 5-10 minutes and is accomplished through two Air Banks located on opposite corners. The Air Banks feature two inflate/deflate valves and an overpressure valve to prevent damage if overinflated. An included 1000W Power Bank allows for immediate inflation without 110V power.

A separate fully automatic, 1200W Auto-Inflator system is included to maintain optimal pressure and provide overpressure protection during multi-day deployments. The system offers three settings for low pressure, high pressure and overpressure, causing the pump to add or remove air during daytime heating or nighttime cooling.

All setup and securing tools are included. With 8 tie-down straps, 16 metal stakes and 4 drive-on anchor plates, the structure can be securely tethered to the ground. Optional Water Weight Bags are available for alternative deployments. Additionally, a 3-step ladder is included to reach the interior roofline.

All tools and ancillary equipment are neatly organized in a lockable 50-gallon rolling chest. For long-term storage, a reusable corrugated pallet box is included, along with an oversized tent storage bag featuring D-ring straps to ensure 'fold challenged' tents make it back in the bag.
