

RAPID DEPLOYMENT SHELTERS

FIRE TRUCK DECONTAMINATION SYSTEM

SKU: K9107

FIRE TRUCK DECON

510 Square Feet

DIMENSIONS:

Space: 510 square feet
Drive-thru clearance: 15.9'W x 15'H
Length: 30 feet
Width: 17 feet
Height: 20 feet
Weight: 500 lbs
Box Size: 48"L x 45"W x 48"H
Inflation Time: 15 min.

KIT COMPONENTS:

1-Piece Tent: Features RF-welded PVC construction with white Oxford fabric walls and ceiling
(2) Plumbing Systems*
(8) Tie Down Straps
(16) Metal Stakes
(1) 50 Gallon Rolling Chest
(1) Corrugated Sleeve Box with Lid

INCLUDED TOOLS:

(2) Inflator/Deflator Pumps
(1) 50' Triple Tap Extension Cord
(2) 3-Step Ladders
(1) Sledge Hammer

FIRE TRUCK DECON

510 Square Feet

PLUMBING SYSTEM

The tent includes an integrated plumbing system designed for exterior vehicle rinse-down. Nineteen fixed-position nozzles spray water at a rate of 1.4 gallons per minute each, helping to cover the surface of vehicles as they pass through. The system includes a dedicated undercarriage spray bar to target lower areas and features quick-connect fittings for straightforward hose attachment and operation.

INFLATION SYSTEM

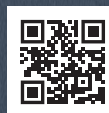

The included inflator/deflator pumps enable fast and efficient setup. With two inflation points allowing simultaneous airflow from both pumps, the tent can be fully deployed in approximately 15 minutes.

TRUCK RINSE-DOWN FOR MOBILE RESPONSE

This inflatable, drive-through decontamination tent is designed to assist with vehicle rinse-downs following response to hazardous incidents. Built with fire departments in mind, it offers quick setup and features two integrated plumbing systems—one positioned overhead and along the sides, and another underneath the vehicle path, to spray water across all exterior surfaces of fire trucks, engines, or rescue units as they pass through. It provides a simple, organized way to support decontamination procedures in the field.

All necessary tools for setup and securing the tent are included, making deployment simple and efficient. The tent features multiple tethering points to ensure stability during use. Custom signage panels are available to display your department's logo or unit name. When not in use, the entire system packs neatly into a durable, reusable 4-foot cube storage container for easy transport and storage.
