

ProPac Canopy Half-Wall Installation Guide

1. Set up canopy, extending the legs to the highest level. This will reveal the lowest set of holes in the legs.

2. With the fabric in place on the half-wall pole, place pin at end of the pole into lowest hole on one leg. Repeat for leg on opposite site.

3. Wrap Velcro straps, located along each end of the half-wall, around legs. Press hook and loop sides together firmly.
